

OHB Sweden is the largest Swedish satellite manufacturer with over 30 years of space heritage. OHB Sweden has been responsible for all national Swedish missions since the 1980's and was also the prime of the only ESA mission which went to the Moon (SMART-1).

OHB Sweden is an end-to-end provider of space systems and develops, builds, tests, and operates satellites for different kinds of space missions within communications, Earth observation, space research, and exploration. OHB Sweden has developed specific expertise within AOCS and Propulsion sub-systems and pioneered autonomous rendezvous and formation flying thanks to the Prisma program. As a Propulsion sub-system provider OHB Sweden has the opportunity to serve all key players of the European Space industry and counts as one of the leaders in Europe in this field. In all domains, OHB Sweden is active in the European and Swedish institutional markets as well as in the commercial market.

The headquarters of OHB Sweden in Kista is home to around 90 highly qualified international employees. We see ourselves as an agile and innovative team for which the competence, enthusiasm, and dedication of each team member is a key asset.

OHB Sweden is a member of the OHB SE Group which currently employs over 3000 people and is the 3rd largest Space company in Europe.

We are now looking for an ambitious, inventive and solutions oriented

Space Business Engineer

As Space Business Engineer you will work in our Business Development Department to develop our business in current and new business areas. The tasks include technical and commercial assessment of business opportunities, development of business plans and preparation of technical and commercial proposals. You will also participate in design studies, and pre-developments for future space based Systems in order to bridge the gap between sales and technology.

You will work independently and in collaboration with expert staff in the organization as required to establish the best possible solutions to be presented to our customers and business partners.

You will also be part of the negotiation team, discussing workshare and solutions with partners, and defending the technical solution and associated costs towards customers.

Qualifications:

- MSc in Engineering (or equivalent), preferably in space related discipline.
- 5 years experience or more with space profile (or similar) preferably with experience in one or more of the following areas: satellite system and subsystem development, mission design, satellite down-stream applications and services. Recently graduated with a relevant space profile and high business interest can be considered.
- Interest in and experience of combining the technical and commercial aspects of space business.
- Experience in writing proposals and international customer interactions.
- Commercial negotiation experience
- Excellent writing skills in English and preferably in Swedish.

Being a company with around 90 international employees and growing, much of the expertise lies on the employee to handle tasks autonomously, efficiently and work closely with colleagues, suppliers and customers. Some travel will be required.

If you are highly motivated to participate in the development of future space systems, feel confident that you meet the above requirements and want to find yourself in a dynamic and inspiring work environment, then we look forward to hearing from you!
